

Build your own scarab necklace

MATERIALS: To build your own necklace print the worksheet below (print it on white bristol if possible). You also need scissors, 25 inch piece of thread, a thick needle to pass the thread, and beads (optional).

INSTRUCTIONS: Cut out each of the wings from the worksheet you printed. With the help of an adult, pass the thread through the needle and then pass the needle through each wing where the white dots are marked. You can decorate it with beads between the wings. When you are done tie both ends of the thread and wear your super cool scarab necklace.
