NUMBER 16

JANUARY 1988

There have been a number of changes and significant additions to our mailing list since we last published it in SCARABAEUS number 14. For this reason, we are again publishing this list. It may be of interest to note that SCARABAEUS is mailed to scarab workers in 42 countries; to 274 addresses. It is extremely unlikely that we are reaching all those interested in the Scarabaeoidea. Please send the addresses of your colleagues not on this list to us so that they may be added to this list.
